DETAILED ACTION

1. Applicants are hereby informed that product claims 46050 and 66-68 were inadvertently grouped with the elected process claims, and are therefore removed from the elected claims and added to the non-elected group of claims.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-16, 40-45 and 51-65 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Jernigan et al 6,384,180 and Ekart et al 6,048,957.

Both of the cited prior arts are of record in the previous communication. Applicants take the position that the cited prior arts are different because they do not disclose polycondensing the melt to an Itv of at least 0.75 while simultaneously obtaining the claimed color characteristics. It is the Examiner's position that Applicants' arguments are not convincing and in this regard, Applicants are directed to column 8, line 5 et seq. of the '180 wherein patentees disclose that the IV of the precursor is generally about 0.7, which Applicants agree is about Itv of about 0.74 which is clearly reads on 0.75. Patentees further disclose therein that the target IV is generally selected to balance good color and minimize the amount of solid stating which is required, and further that, the preferred IV is from about 0.40 to about 1.2. It is the Examiner's position

Art Unit: 1711

that characteristics not expressly disclosed would have been inherent in the prior art process or at least would have been obvious to one of ordinary skill in this art based on the disclosures of the cited prior art.

4. Other references listed on PTO-1449 have been made part of the record.
